WELCOME!

The Digital Oil & Gas Summit is an invitation-only forum for senior leaders driving digital and operational change across the oil and gas value chain. The Summit brings together **decision-makers** from upstream, midstream, and downstream organisations to examine how digital technologies are being applied to improve efficiency, resilience, safety, and long-term performance.

Developed with direct input from the industry, the Summit connects executives responsible for **digital, data, operations, and transformation** through two days of structured, interactive discussion. Formats include **Think Tank Challenges**, curated **Roundtables**, immersive **Case Studies**, and private **1:1 meetings** – designed to move beyond presentations and into practical, peer-to-peer problem solving.

WHY ATTEND?

Innovative Event Format

Engage in a dynamic, interactive experience through Team Challenges, Roundtables, Case Studies, Interactive Headline Panels, and Private Meetings, designed to foster valuable dialogue and collaboration.

Shaped by Real-World Experience

An agenda crafted by industry leaders ensures sessions tackle real-world challenges. Engage with content directly relevant to your needs, driven by those who understand the sector's demands.

Exclusive Invitation Only Forum

Network with senior decision-makers from Europe's oil and gas industry. Engage in candid discussion and collaborative problem-solving within a closed, invitation-only forum.

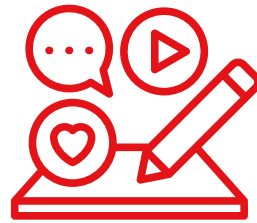

Meet new technology partners

Discover cutting-edge solutions from top tech partners. Explore innovative tools to drive digital transformation. Engage with experts to find solutions to solve industry challenges and achieve your goals.

An Agenda Built on Insight

The **Digital Oil & Gas Summit Advisory Committee** defines the **Headline Themes** that shape the agenda. Session topics are guided by delegate input collected during registration, ensuring discussions align with current priorities across the energy sector.

Using this insight, the Committee curates the two-day programme, developing **Interactive Panels, Think Tank Challenges**, and **Case Studies** focused on real-world challenges facing energy leaders like you.

Your Personal Agenda

You'll receive a personalised agenda and take part only in the **Case Studies, Meetings**, and **Think Tank Challenges** most relevant to your role and objectives.

Headline Themes

1

Digital Transformation & Data Optimisation

How oil and gas operators are using **data, analytics,** and **digital workflows** to improve margins, reliability, and efficiency across the value chain—focusing on real-time visibility, standardised data, and investment priorities delivering measurable capex and opex impact.

Strategic Priorities: Data management & quality, digital skills, operational excellence, asset reliability, decarbonisation.

2

AI & Predictive Maintenance

Exploring where **AI** is already reducing downtime and maintenance costs across upstream, midstream, and downstream operations, and what it takes to **scale predictive maintenance,** automation, and digital twins with **clear ROI.**

Strategic Priorities: AI & analytics, predictive maintenance, robotics & automation, autonomous systems, digital twins.

3

IoT, Cybersecurity & Connectivity

Examining how operators are enabling connected operations while **strengthening IT/OT cybersecurity**—covering secure networks, edge computing, real-time monitoring, and automation in remote or high-risk environments.

Strategic Priorities: Cyber resilience, IoT & connectivity, edge computing, asset monitoring, human-machine collaboration.

4

Scaling Data & AI with Legacy Integration

Focusing on how organisations **move beyond pilots** to enterprise-scale deployment by integrating new digital and AI platforms with legacy infrastructure—while maintaining uptime, reliability, and **operational continuity.**

Strategic Priorities: Scaling digital initiatives, legacy integration, data architecture, governance, OT/IT alignment.

ADVISORY COMMITTEE

Our Advisory Committee is made up of senior industry leaders who collectively define the core themes of the summit, drawing on real challenges and priorities within their own organisations – ensuring the agenda is industry-led, not sponsor-driven.

Ahmed M. Al Saleh
Head of Process Control
& IT Engineering Unit
Saudi Aramco

Nick Giannakakis
Group CIO
Motor Oil

Prashant Soni
CEO
VISCO

Further Advisory Committee members will be announced shortly.

Event Format

If you've sat through one too many presentations that fail to engage, this will feel different. Expect **interactive formats** built around discussion and driven by **real participation**.

Our Summit redefines the traditional format with dynamic, engaging sessions including **Think Tank Challenges, Headline Panels, Roundtables, Case Studies, and 1-2-1 meetings**.

We operate under a **strict confidentiality policy**, with no third-party media or press onsite. This creates a trusted environment where senior leaders can engage openly, share insight, and have **meaningful, candid discussions**.

It's this unique, trusted atmosphere that makes our Summit a go-to gathering for the most influential leaders in the industry, who appreciate the opportunity to **connect, collaborate, and drive real change**.

Event Format **CONT.**

THINK TANK CHALLENGES

Participate in a series of three small group interactive discussions around a pre-set challenge. Pre-event, you will select your tables based on the most relevant and interesting topics. Then, over three 25-minute periods, you will work as a team to identify possible solutions and business impacts.

CASE STUDY PRESENTATIONS

This new presentation format prioritises inclusion. Moving away from the traditional PowerPoint-heavy conferences, these sessions foster interaction and engagement.

HOSTED ROUNDTABLES

Each 45-minute roundtable, limited to 10 guests, fosters open dialogue and debate, moderated to ensure engaging experience sharing. Guests choose their topics in advance based on their interests and relevance.

HEADLINE PANELS

Our main-stage panel discussions are actual discussions! Attendees are invited to share their experiences and question or challenge the panellists, fostering a dynamic and interactive session.

1-2-1 MEETINGS

Pre-arranged 1-2-1 meetings during case study sessions offer a quiet, intimate environment for meaningful discussions. These meetings are pre-scheduled to ensure you only connect with suppliers relevant to your current needs.

11-12 JUNE 2026

The Venue

The Summit will take place at the Meliá Avenida América, Juan Ignacio Luca De Tena Street, 36, Madrid.

*Spain plays a strategic role in Europe's oil and gas landscape, with the continent's largest regasification capacity, long-standing links to **North African gas supply**, and a strong concentration of upstream, midstream, and downstream operators.*

*Combined with Madrid's **accessibility** and international connectivity, this makes the city an ideal setting for senior-level discussion on digital transformation, **operational resilience**, and performance across the oil and gas value chain.*
